

At end of configuration i cant'entry in created folder ( may be because processor is a xeon type )

The image shows a screenshot of a TrueNAS CORE web interface in a browser window. The browser address bar shows the URL `192.168.0.222/ui/services`. The TrueNAS interface includes a sidebar with navigation options like Dashboard, Accounts, System, Tasks, Network, Storage, Directory Services, Sharing, Services, Plugins, Jails, Reporting, Virtual Machines, Display System Processes, Shell, and Guide. The main content area is titled "Services".

Overlaid on the TrueNAS interface is a Windows File Explorer window titled "Questo PC". The File Explorer shows a network share path `\\192.168.0.222\Roberto` in the address bar. A dialog box titled "Connessione unità di rete" is open, displaying the message "Tentativo di connessione a \\192.168.0.222\Roberto in corso...". The dialog has an "Annulla" button. Below the dialog, the File Explorer shows a drive letter "Z:" and the same network path. There are checkboxes for "Riconnetti all'accesso" and "Connetti con credenziali diverse", both of which are checked. A link for "Connessione a un sito Web per l'archiviazione di documenti e immagini." is also visible.

The Windows taskbar at the bottom shows the system tray with the time `21:12` and date `16/06/2021`.
